

PUBLIC NOTICE

PUBLIC INFORMATION MEETING

Tuesday, June 24, 2025 | 6 P.M.

**Franco American War Veterans
300 Water Street, Leominster, MA**

United Material Management of Leominster, LLC (UMML) is hosting a Public Information Meeting for its proposed permit modification at its existing transfer station located at 200 Tanzio Road, Leominster, Massachusetts. UMML representatives will present the studies conducted since the September 2024 Massachusetts Environmental Policy Act (MEPA) Environmental Notification Form submittal and the information to be included in the upcoming Draft Environmental Impact Report submittal. There will be opportunities for public comments and questions following the presentation.

UMML is a state-of-the-art municipal solid waste (MSW) and construction & demolition (C&D) waste handling and transfer station with an integrated rail line. The facility specializes in the recycling of C&D debris and the transfer of residuals for responsible end disposal. In order to meet the growing demand for waste handling in Massachusetts, UMML is proposing a project, subject to Massachusetts Environmental Policy Act (MEPA) review, that will increase the daily handling capacity at its current facility. The facility will not require any building expansion to accommodate the increased handling capacity. UMML is currently permitted to process up to 1,000 tons of waste per day (TPD). This project would increase that capacity to 1,500 TPD.

REGISTRATION INFORMATION

To register for the meeting, please email **comms@win-waste.com**.

*To request translation services for the meeting, please submit your request to **comms@win-waste.com** by June 20, 2025.*
